

## IAG Young Scientist Award 2023

The International Association of Geoanalysts (IAG) is sponsoring an award for research by a young scientist that closely reflects the goals of our Association. Specifically, we are looking for research reporting advances in the following key areas of geoanalysis:

- The characterisation of new geochemical reference materials
- The development or validation of new geoanalytical methods related to isotopic systems, environmental and exploration geochemistry, for example.
- The demonstration of new or refined statistical methods as applied to geochemical data

The candidate must be nominated by a senior scientist. The award is based upon first-authored papers published early in the candidate's career.

In order to be eligible for consideration, the following criteria must be fulfilled:

- The candidate must currently be studying for a Master's degree or Doctorate, or must be within 3 years of receiving this degree in the year the candidate is nominated.
- The candidate must be first author of at least one peer-reviewed paper in an international journal and must have conducted the majority of the work of this publication on high-quality geoanalytical or metrological research.
- The candidate will attend the Goldschmidt Conference 2023 in Lyon, France either in person or virtually.

The **IAG Young Scientist Award** consists of a certificate recognizing the winner's contribution to the field of geoanalysis, a cash award of 1000 USD, registration fee for the Goldschmidt Conference 2023 in Lyon, France where the winner will be promoted as "IAG Young Scientist", and an 18-month free membership of the IAG.

# Nomination Form for IAG Young Scientist Award 2023

Name of Senior Scientist who is nominating the Candidate: \_\_\_\_\_

Affiliation: \_\_\_\_\_  
\_\_\_\_\_

E-mail address: \_\_\_\_\_

Candidate's full name: \_\_\_\_\_

Affiliation: \_\_\_\_\_  
\_\_\_\_\_

E-mail address: \_\_\_\_\_

Please give details of the year the Master's degree or Doctorate was awarded, and the institution (List degree, year, institution). *Important: Candidates must currently be studying for their Master's or Doctoral degree or be within 3 years of receiving their Masters degree or Doctorate when the candidate is nominated for the IAG Award, i.e., in 2019 or later.*

Degree:

Year:

Institution:

Focus of research:

Please list the candidate's contributions:

*At least one first-authored paper accepted for publication or already published in an international peer-reviewed journal in the field of high-quality geoanalytical or metrological research is required. Only the two most relevant papers should be listed here:*

1)

2)

---

## Submission Instructions:

To nominate a candidate, please e-mail this nomination form, along with the following documents to Jennifer Cook, Honorary Secretary, International Association of Geoanalysts, at [jmc@bgs.ac.uk](mailto:jmc@bgs.ac.uk)

- One letter of support from a senior scientist from the geosciences community – up to 300 words
- CV or resumé of the candidate in a Word or PDF file – maximum one page
- pdfs of the above-mentioned publications

Submission deadline for the 2023 Award: 31 October 2022.

Submitted contributions will be judged by a scientific committee appointed by the IAG Council.

Winners will be announced and notified by 1 February 2023.
